

# Overview

**The W.I.D.E. Contact** eliminates the need for any wiring between a door (moveable object) and door jamb (fixed object). Hence the name **Wires In Doors Eliminated**.

**The W.I.D.E. Contact** can be used to operate any powered accessory on a moveable object. Almost anything can be powered with this low voltage, **PATENTED** contact.

**The W.I.D.E. Contact** is spring loaded, and adjustable from 1/4" to 11/16". The contact can accommodate either positive or negative ground wiring schematics.

**The W.I.D.E. Contact** will handle as much as 60 AMPS, and is the only electrical device known that carries a **full replacement guarantee**. Another feature of the contact is that it will mount any where on the door jamb (fixed object), not just on the hinged side.

Just think of it, **no more broken wires** in door jamb's causing down time, and now being able to install any door accessory quicker, easier and **more efficiently**.

## Frequently asked Questions

**Q: How does the contact work with stereo speakers?**

A: **Perfect**. The contacts have been tested by a major stereo installer in the Denver area with **EXCELLENT RESULTS!**

**Q: Can Contacts be used with courtesy lights in the door?**

A: No. When the door is opened, power to the accessory is lost.

**Q: Does one of the buttons need to be used for a ground?**

A: On a steel car, it's up to the individual; ground has a path through the hinge. On a glass car. Yes, one button is needed for ground.

**Q: How many AMPS will the Contacts carry?**

A: The Contacts have been tested up to 60 AMPS.

**Q: Do the Contacts need to be mounted in the pinch point (hinged side) of the door?**

A: No. They mount anywhere on the door frame. (**Excellent** for cars with suicide doors.)

**Q: Will the W.I.D.E. Contact work with a remote door opener?**

A: YES!

**Q: Will water or moisture effect the W.I.D.E. Contact?**

A: No. Tested for over 10 years in all kinds of weather, mounted in the worst place to have Contacts on a car, we have had **NO FAILURES**.

**Q: Will the Contacts corrode?**

A: The contacts are made of the finest brass available. Over a period of time they will corrode **SLIGHTLY** (like all metals will) but the design makes them **SELF-CLEANING**.

**Q: Why use brass? Why not Stainless Steel?**

A: Brass is a **MUCH BETTER CONDUCTOR** with a resistance factor almost **7 TIMES LESS!**

**Q: How big of a hole will have to be drilled in the door jamb and door?**

A: The largest hole is 1/2"x1 3/4" the smallest is 1/2" round.

**Q: Why are the Contacts packaged in single sets ( per door)?**

A: In most cases, the need for the same number of Contacts on both doors is rare. **Why buy what you don't need?**

**Q: How much room is needed in the door Jamb?**

A: less than 1/4".

## Uses include(but not Limited To)...

Remote Entry Systems.Power Windows & Locks  
Stereo & Alarm Systems .....and many more

## Eliminate Wires In...

Car & Truck Doors, Trunks & Tailgates,  
Trailer Doors & Ramps, Tilt Front Ends,  
Model Railroads, R.V.s, Fire Trucks,  
Wheel Chairs, Wheel Chair Lifts.

With a little thought the uses are

**Endless!!!!!!**
